

## Medical Authorization Form

Founded in 2003, Kids in Flight is a non-profit organization that uses aviation related activities and airplane rides to give children with serious illnesses or disabilities an opportunity to escape by soaring above their crises, complications and struggles. Through a variety of exciting, fun-filled programs and the thrill of flight, children and their families will soar above their crises.

As the child's physician, Kids in Flight asks you to authorize this child's participation in a sightseeing flight lasting approximately 30 minutes in a small, non-pressurized aircraft, typically below 5,000 feet. This form also confirms the child's condition and treatment status as specified in his or her online application. It is required that this form be **received** by May 20, 2018 for this child to be considered for acceptance. See submission information below.

Child's First and Last Name:

---

Child's illness/condition/disability:

---

Is the child currently in treatment?

---

Is the child able to enter/exit a small plane  
(climb onto wing and duck into fuselage)
